

Aprilaire®

Wi-Fi Thermostats

With IAQ Control

Aprilaire Wi-Fi Thermostats

For 75 years, Aprilaire has been committed to the success of HVAC contractors by providing solutions designed for consumer health, comfort, protection and energy savings. Our new line of Wi-Fi thermostats continues that tradition.

Clean and simple, the Aprilaire Wi-Fi Thermostat App has intuitive temperature control features designed so anyone can understand and use them to effectively deliver comfort and energy savings.

But that's not all. Aprilaire, the #1 provider of indoor air quality solutions, also offers IAQ Control: the ability to balance all aspects of indoor air quality, including Temperature, Humidity, Air Purity and Fresh Air.

Energy Savings—without Sacrificing Comfort

ENERGY STAR® stopped certifying programmable thermostats because consumers found them difficult to use. Aprilaire Wi-Fi Thermostats offer an accessible, simple user interface for control features anyone can use.

These include:

Schedule Programming

Intuitive program setup and adjustment with a graphical, friendly design.

Away and Heat Blast

When activated, the system automatically adjusts the temperature when leaving or arriving and can temporarily override an established program.

*Source data: ENERGY STAR

Peace of Mind and Protection

Email alerts that immediately and proactively notify the homeowner when failures occur, temperature and RH levels are exceeded, or when service or maintenance is needed.

Wi-Fi IAQ Control

Offer your customers the ability to control all configurations of heating/cooling and IAQ accessories including Humidifier, Dehumidifier, Air Cleaner and Ventilator. All installed products are conveniently controlled from one app.

Wi-Fi IAQ Control Product Portfolio

Aprilaire Wi-Fi thermostats with IAQ Control are designed to offer consumers a variety of key features and price points. From customers who require only temperature control at an attractive price point to those who want to control all aspects of IAQ in one simple interface, Aprilaire makes it easy to select the right product.

Model 8920W

Industry's first color touch screen with all control options on the home screen.

- + Event-Based™ Air Cleaning
- + Humidity and Ventilation
- + Full color Wi-Fi touch screen

Model 8910W

Easy-to-use touch screen with all control options on the home screen.

- + Event-Based™ Air Cleaning
- + Humidity and Ventilation
- + Wi-Fi touch screen

Model 8620W

Easy to use touch screen designed for temperature and humidity control.

- + Event-Based™ Air Cleaning
- + Humidity or Ventilation
- + Wi-Fi touch screen

Model 8476W

Temperature control.

- + Event-Based™ Air Cleaning
- + Wi-Fi

See product lineup on back page for complete specifications.

Aprilaire Wi-Fi IAQ Control – Temperature,

Aprilaire Wi-Fi Thermostats with IAQ Control represent an industry-leading design focused on consumer usability; providing users information when and where it's needed. Options can be selected that automatically control the indoor environment based on the needs of each individual consumer's home and family. When events occur in the home that affect indoor air quality, Aprilaire exclusive Event-Based™ control options make managing and improving the air quality simple.

Industry-exclusive Features

- + Ability to control temperature and all IAQ equipment
- + Event-Based™ Air Cleaning and Fresh Air Ventilation
- + Automatic humidifier control with accurate ODT control points
- + Automatic dehumidifier control
- + Temperature overrides for instant comfort (“Heat Blast”) and maximum energy savings (“Away”)
- + All screens display the status of all IAQ and HVAC equipment
- + 3-Day weather forecast with pollen and mold levels
- + Features disabled from thermostat are automatically removed from the app
- + Informs homeowners on the benefits of IAQ control
- + “Product Not Installed” screen suggests additional IAQ products
- + Easy to identify and access “Help” screens 

Easy-to-access navigation

The navigation bar showing all control options and status of equipment (on, off, idle) is visible from any screen. When first entering the app, the screen will always default to temperature.

Temperature

Not only do Wi-Fi thermostats give your customers the ability to modify their home's temperature from any mobile device, the

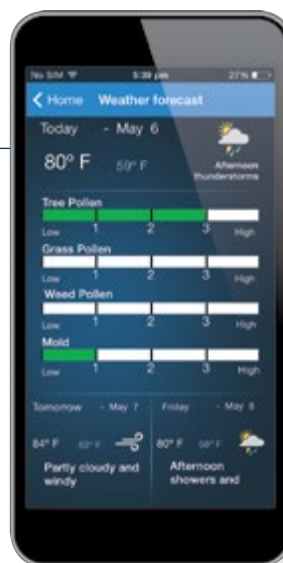

Aprilaire scheduling and program override provide the usability needed to save money—without sacrificing comfort.

Air Purity, Humidity, Fresh Air Ventilation

Air Purity

The air customers breathe inside their homes can be the most polluted air they breathe all day. People who suffer from asthma and allergies will benefit from the ability to control air cleaning—especially with the unmatched simplicity of Aprilaire's exclusive Event-Based™ Air Cleaning feature.

Aprilaire 3-day weather forecast includes pollen and mold conditions to provide the information needed to determine when air cleaning is necessary.

Humidity

Too much or too little humidity can play a big role in your customers' comfort and health. Having the ability to verify and control humidity is required by many consumers.

Automatic Humidifier Control

Continuously monitors outdoor temperature while automatically adjusting the humidifier to provide optimum RH levels inside the home. Manual control is also available, if needed.

Automatic Dehumidifier Control

Automatically turns on a dedicated dehumidifier based on relative humidity. It couldn't be any simpler.

Fresh Air Ventilation

Fresh air ventilated from the outside is required in many new homes. That's why Aprilaire controls are designed to meet all ASHRAE 62.2–2010 requirements. Simply set the parameters and the control will ventilate the proper amount of air. Event-Based™ is also available for customers who want additional fresh air for circumstances such as cooking or parties.

Wi-Fi Connection That's Simple, Safe & Secure

Aprilaire

Setup with your customer's home network is simple and secure, with the app being setup and controlled by the customer—not you. Aprilaire also provides setup support via phone at 1-800-545-2219 or online at My.Aprilaire.com.

- 1** **DOWNLOAD** the Aprilaire Wi-Fi Thermostat App.
- 2** **REGISTER** your Aprilaire user account.
- 3** **CONNECT** the Wi-Fi thermostat to your home network.

Your Customers' Communication is Protected

All communication between your customers' device and your customers' thermostat uses industry standard TLS (Transport Layer Security) 256 bit encryption.

Your Customers' Personal Data is Protected

We only store personal data on our database servers. We use Amazon Web Services (AWS) to host our database servers. We will not share personal data with any third parties. We may use only non-personal data internally for analyzing overall usage of the app and equipment.
