

Specifications

- Product** Rubber/Cork Anti-Vibration Pad
- Application** Refrigeration and Air Conditioning, or other high vibration equipment or machinery.
- Purpose** These Anti-Vibration Pads are designed to reduce vibration and noise associated with HVAC equipment and other similar machinery.
- Composition** Cork inner padding between corrugated elastomeric, oil resistant rubber padding.
- Advantages** The rubber outer padding adds stability and resists oil, as well as being stackable. Additionally, the 90 degree rib rotation of top and bottom rubber layers offers maximum vibration damping regardless of equipment orientation. The high quality rubber and cork construction makes for an affordable and long lasting anti-vibration pad.
- Load Rating** 50 lbs. per square inch

Package Metrics

- Producer of Goods** DiversiTech
- Domestic/Foreign Commodity** Foreign
